SUMMARY
Software engineer with 2 years of experience building backend services and applied ML features.

EXPERIENCE
Backend Engineer | Northwind Labs | 2023 - Present
· Built a Python FastAPI service handling 2M requests per day with Redis caching.
· Reduced p95 latency from 800 ms to 210 ms by adding async database access and query indexes.
· Led migration of a monolith billing module to Docker containers deployed on AWS ECS.

Software Engineering Intern | Contoso Systems | 2022
· Wrote React dashboards consuming REST APIs and added unit tests with pytest and Jest.
· Automated nightly data validation jobs in Python, cutting manual checks by 6 hours a week.

PROJECTS
Ocular AI | Python, PyTorch, FastAPI, Docker
· Built a retinal image classifier reaching 94% accuracy on a public diabetic retinopathy dataset.
· Served the model through a FastAPI endpoint with batch inference and a React upload UI.

DocuChat RAG | LangChain, Chroma, Gemini
· Created a retrieval-augmented chatbot over PDF documents using hybrid search and reranking.
· Evaluated chunking strategies with hit rate and MRR on 40 labelled questions.

EDUCATION
B.Tech in Computer Science | Example Institute of Technology | 2018 - 2022

SKILLS
Languages: Python, JavaScript, SQL, Java
Frameworks: FastAPI, React, LangChain, PyTorch
Tools: Docker, AWS (S3, ECS, EC2), MongoDB, PostgreSQL, Git
